DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nagura et al.

Nagura shows the vehicle transponder (figures 3, 8, 13, 22, and 31) for transmitting vehicle compliance data; mobile detector means (figures 7, 11, 13, 23) for sending an interrogation signal to the vehicle transponder means and means (52A in figure 3, 20B in figures 7 and 9, 44C in figure 11, 42C in figure 13, and 30D in figure 25) for determining a compliance status based on the vehicle compliance data, see col. 2, col. 3, lines 14-22, and col. 6.

With respect to claims 3, 8-10, see col. 18, lines 40-50, and col. 21, lines 39-54..

With respect to claims 4 and 13, note EEPROM 114D, col. 24, lines 22 et seq.

With respect to claim 5, note radio and microwave, col. 15, lines 56-61.

With respect to claim 6, note first and second antennas in figures 2 and 4-6.

With respect to claim 7, note the IC card 1123D in figure 33, col. 24.

With respect to claim 11, note the change by officials only with respect to the EEPROM 114D, col. 24, lines 22 et seq.

With respect to claim 12 the signal transmitted by the transponder to the interrogator is a signal whose "frequency" is indicative of the compliance status.
